

MILDRED TROTTER PAPERS

Collection Summary

Volume: 22 linear feet
Inclusive dates: 1922-1985
Collection code: FC029

Historical Note

Mildred Trotter (1899-1991) is regarded as one of the most eminent 20th century contributors to the field of physical anthropology, especially to knowledge about human bone and hair. A native of Pennsylvania, she received her bachelor's degree from Mount Holyoke College in Massachusetts. She joined the Washington University School of Medicine Department of Anatomy in 1920 as a researcher and her subsequent work here was applied towards a Ph.D., which she received in 1924. Her full time teaching career began that same year, collaborating with Robert J. Terry in the gross anatomy curriculum. In this capacity, Trotter guided medical students for over fifty years in the exacting art of dissection. Her research efforts have led to findings that have proven useful not only to clinical medicine, but also to fields such as forensic science, physical anthropology, and archaeology. She contributed much of what is known today about human skeletal structure and density, and particularly the characteristics of long limb bones. Trotter was named to a full professorship in 1946, thus making her the first woman to achieve this rank at Washington University School of Medicine. She was a visiting fellow, lecturer, and professor at several universities in this country and abroad and a consultant to the U.S. Armed Forces. She became a professor *emerita* in 1967.

Provenance

Mildred Trotter formally gave her papers to the Archives in 1979, with latter additions received as late as 1990.

Access and Use

The collection is open and accessible for research. Certain categories of documentation, however, carry restrictions on access. For detailed information, contact the Archives and Rare Book Section (arb@wusm.wustl.edu). The Library holds copyright.

Scope and Content

The Mildred Trotter papers group consists of fourteen series. The Trotter papers are rich in information not only about her fields of expertise, but about the School of Medicine in general and about opportunities for women in medical science during the first half of the twentieth century. Users are advised to consult Series 1 first, since it contains narrative memoirs that may serve to place her accomplishments in contexts of her own choosing.

Organization of the Collection (Series List)

Series 1: Narrative accounts, 1972, 1979, Box 1.

Series 2: Correspondence, 1922-1937, Boxes 2-3.

Series 3: Correspondence, 1945-1985, Boxes 4-8.

Series 4: Funded projects, 1954-1978, Box 9.

Series 5: Research data and administrative issues, 1947-1985, Boxes 10-16, 31-32.

Series 6: Research data card files, 1925-1950, with additions by others, 1992-1994, Boxes 17-24.

Series 7: Documents concerning Robert J. Terry, 1935-1981, Box 25.

Series 8: Mount Holyoke College correspondence, 1941-1983, Box 25.

MILDRED TROTTER PAPERS
SERIES 6: RESEARCH DATA CARD FILES, 1925-1950, WITH ADDITIONS BY
OTHERS, 1992-1994

Data from MT's work on human bones, compiled under U. S. Army contract (the "Locator cards AGRS") or as part of academic research, 1925-1950. Note: Personal identifiers may not be copied or divulged by researchers without permission of the Archivist. MT's original arrangement, with additions documenting research use of the materials, 1992-1994. Boxes 17-24.

BOX 17

Locator cards AGRS (numerical): 1-578, 1948-1949.

Information about World War II Pacific Theater casualties gathered under MT's direction. Cards measure 4 x 6 inches.

BOX 18

Locator cards AGRS (numerical) and other data cards, 1948-1949 and n.d.

This box contains cards in MT's original arrangement. Divider cards bear the following notations: (1) White males; (2) White females; (3) Negro males; (4) Negro females; (5) Mexicans, Indians, Filipinos; (6) White; (7) WM [white males?], Inc. (fib. and ulna) added to 545 complete to make 710 WM; (8) The 100 from misc. inc. which were checked by new formulas; (9) Never used. Cards measure 4 x 6 inches.

BOX 19

Locator cards AGRS (numerical), n.d.

Cards were wrapped in a manila envelope bearing the following notation: Data on remains originally unidentified. Divider cards bear the following notations: (1) Negro; (2) White recorded; (3) [White] 25 years+; (4) [White] under 25 years; (5) Information missing. Cards measure 4 x 6 inches.

Statistical tabulations, probably based on data from locator cards, n.d.

Cards measure 3 x 5 inches.

Citations to books and articles on physical anthropology, n.d.

Cards in envelope. Also contains note relating to use of x-ray technology for imprinting serial numbers on bones. Cards measure 3 x 5 and 4 x 6 inches.

BOX 20

Statistical tabulations based on data from cadavers dissected at WUSM, 1925-1943.

The data are from skeletons in the Terry Skeleton Collection. Divider cards bear the following notations: (1) White males; (2) White females; (3) Negro males; (4) Negro females. Cards measure 4 x 6 inches.

BOX 21

Statistical tabulations, n.d.

The data are from skeletons in the Terry Skeleton Collection. Cards measure 4 x 6 inches. They correspond to data in punch cards in boxes 22-24.

BOX 22

IBM punch card plan - Measurement of long bones, 1950.

Computer punch cards measuring 3 x 7 1/2 inches with accompanying information and correspondence in a folder.

BOX 23

Measurement of long bones study, 1950.

Computer punch cards measuring 3 x 7 1/2 inches. Information on wrapper: Punch cards from Doran (Texas) of data of l.l. bone length for 1952 stature paper; also, data cards. Cards divided as follows: (1) White Army male, complete, n = 545; (2) White male, n = 255?; White female, n = 63, ok?; Negro male, n = 360?; Negro female.

BOX 24

Measurement of long bones study, 1950.

Computer punch cards of the same set as in Box 23. Divider (envelope) reads: Some of each rare sex group; why?; Some (not all?) have missing volume [?].

Long bone data on a 3.5 inch diskette, ASCII format (*.dat), 1994, 24:1.

Long bone data on a 3.5 inch diskette, Paradox software format (*.db), 1994, 24:2.

Microfilm of the original cards, 16mm cassette, 1994, 24:3.

The two diskettes contain data that was transferred from the punch cards and augmented by Lee Meadows Jantz, University of Tennessee. Ms. Jantz also microfilmed the original cards. See Jantz RL, Hunt DR, Meadows L, Maximum length of the tibia: how did Trotter measure it?, American Journal of Physical Anthropology, 1994, 93:525-28 (copy in FP005).
