

Developmental Biology Journals and Policies re NIH Policy

The Biochemical Journal

http://publicaccess.nih.gov/submit_process_journals.htm

If you publish in this journal, no further action is needed to comply with the submission requirement of NIH Public Access Policy.

Biochemistry

ACS is currently working on a new policy that reflects the revised NIH Public Access Policy. The policy will be made available on or before April 7, 2008.

Bioessays

BMC Biology

http://publicaccess.nih.gov/submit_process_journals.htm

If you publish in this journal, no further action is needed to comply with the submission requirement of NIH Public Access Policy.

Blood

http://publicaccess.nih.gov/submit_process_journals.htm

If you publish in this journal, no further action is needed to comply with the submission requirement of NIH Public Access Policy.

Cellular and Molecular Life Sciences

No information.

Development

http://www.biologists.com/web/submissions/dev_information.html

Authors funded by NIH grants awarded after May 2005; by Wellcome Trust grants awarded after October 2005; or by UK Medical Research Council (MRC) and UK Biotechnology & Biological Sciences Research Council (BBSRC) grants awarded after October 2006 may deposit accepted author manuscript files (**not** the typeset journal PDF file) in PubMedCentral for release six months after publication, or immediately if an 'open access' fee has been paid.

Developmental Biology

<http://www.elsevier.com/wps/find/authorsview.authors/nihauthorrequest>

Elsevier will send the original version of the author's manuscript, which was accepted and sent to our production department and reflects any author-agreed changes made in response to

Information current as of 27 March 2008. Please verify policies as noted with the publisher or check http://publicaccess.nih.gov/submit_process_journals.htm

peer-review comments. Elsevier will authorize its public access posting 12 months after final publication. Please note the final published version is not posted on PubMed Central.

Journal of Biological Chemistry

<http://www.jbc.org/misc/JBCRepository.shtml>

As of April 7, 2008, the final redacted versions of all research articles resulting from partial or complete support from NIH must be deposited immediately in the NIH repository, PubMed Central. PubMed Central will not release articles to readers for 12 months. While compliance to this NIH mandate is the responsibility of the authors, ASBMB will automatically deposit articles on behalf of authors as a service.

ASBMB/JBC, as copyright holder, grants permission to all authors, for the sole purpose of compliance with the NIH request, to deposit their accepted manuscripts in PubMed Central.

During submission of a manuscript for review, authors will be required to indicate whether or not the work resulted from NIH funding. If NIH funding is involved, and the paper is ultimately accepted for publication, the final redacted version will automatically and immediately be sent to the NIH on behalf of the authors. This will completely satisfy the NIH mandate and authors need do nothing else.

This service will be free for ASBMB members and will cost \$50 for non-members. The \$50 fee covers the cost to the publisher to tag and upload high resolution figures and supply supplemental data from our vendors to PubMed Central. [ASBMB membership currently costs \$140/yr and includes many additional benefits so you may wish to consider joining and receive this service free of charge. [http://www.asbmb.org/.](http://www.asbmb.org/)]

Journal of Neuroscience

<http://www.jneurosci.org/misc/ifacomply.shtml>

Authors who wish to deposit their manuscripts in PMC should submit final, peer-reviewed and accepted manuscripts, including any additional files containing figures, tables, or supplementary information, to NIHMS at <http://www.nihms.nih.gov/>. The system accepts a variety of word-processing file formats.

The Society for Neuroscience will continue to retain copyright to articles published in *The Journal of Neuroscience*. However, the Society has modified the Copyright Assignment and Experimental Procedures Statement for the *Journal* to allow our authors to deposit their accepted manuscripts in PMC (or similar repositories of other government funding agencies), provided access to the manuscript is granted no earlier than 6 months after the manuscript has been published in *The Journal of Neuroscience*, the Society's current open access policy for the *Journal*.

The manuscript submitted to PMC must be identical to the accepted, unedited manuscript that was accepted for publication by the *Journal*; authors may not submit the final copyedited version of their *Journal of Neuroscience* articles to PMC. *Journal* authors are required to insert the following phrase on the title page of the manuscript before it is uploaded to PMC:

Information current as of 27 March 2008. Please verify policies as noted with the publisher or check http://publicaccess.nih.gov/submit_process_journals.htm

“This article is an un-copied author manuscript that has been accepted for publication in *The Journal of Neuroscience*, copyright 200_ Society for Neuroscience. The Society for Neuroscience disclaims any responsibility or liability for errors or omissions in this version of the manuscript or any version derived from it by NIH or other parties.” The PMC entry will include a link back to the author’s final publication in *The Journal of Neuroscience*, which is the version of record. The intent is to make clear to the reader that the PMC manuscript is not the final version of your article. By directing readers to the article of record, we hope to ensure accurate (and accurately counted) citations to your paper.

Nature

http://www.nature.com/authors/editorial_policies/license.html

When a manuscript is accepted for publication in an NPG journal, authors are encouraged to submit the author's version of the accepted paper (the unedited manuscript) to [PubMed Central](#) or other appropriate funding body's archive, for public release six months after publication. In addition, authors are encouraged to archive this version of the manuscript in their institution's repositories and, if they wish, on their personal websites, also six months after the original publication. In all these cases, authors should cite the publication reference and [DOI number](#) on any deposited version, and provide a link from it to the URL of the published article on the journal's website (see [publications A-Z index](#)).

Nature Review Microbiology

http://www.nature.com/authors/editorial_policies/license.html

When a manuscript is accepted for publication in an NPG journal, authors are encouraged to submit the author's version of the accepted paper (the unedited manuscript) to [PubMed Central](#) or other appropriate funding body's archive, for public release six months after publication. In addition, authors are encouraged to archive this version of the manuscript in their institution's repositories and, if they wish, on their personal websites, also six months after the original publication. Nucleic Acid Research

http://publicaccess.nih.gov/submit_process_journals.htm

If you publish in this journal, no further action is needed to comply with the submission requirement of NIH Public Access Policy.

PNAS

http://publicaccess.nih.gov/submit_process_journals.htm

If you publish in this journal, no further action is needed to comply with the submission requirement of NIH Public Access Policy.

Science

<http://www.sciencemag.org/help/authors/pmc.dtl>

For research papers created under grants awarded no earlier than 2 May 2005, and for which the authors are required by their funding agencies to make their research results publicly available, authors may implement posting to the funding body's archive or designated repository, no sooner than six months after final publication, of the "accepted version" of the paper, provided the posting is linked back to the original *Science* version and includes the published paper's full reference citation. The "accepted version" is the version of the paper accepted for publication in *Science* after changes resulting from peer review, but before *Science*'s editing, image quality control, and production. This policy does not apply to editorials, reviews, or commentary pieces. In submitting to archives such as PMC, authors of *Science* papers should set the time of public release of the accepted version at six months after final publication in *Science*.
