

## **Memory and Aging Project - Journals and Policies re NIH Policy**

### **Acta- Neuropathologica**

No information.

### **Aging, Neuropsychology and Cognition**

No information.

### **Alcoholism: Clinical and Experimental Research**

No information.

### **Alzheimer's and Dementia**

<http://www.elsevier.com/wps/find/authorsview.authors/nihauthorrequest>

As a service to our authors, Elsevier will deposit to PubMed Central (PMC) author manuscripts on behalf of Elsevier authors reporting NIH funded research. This service is a continuation of Elsevier's 2005 agreement with the NIH when the NIH introduced their voluntary 'Public Access Policy.'

The service will help authors comply with the National Institutes of Health (NIH) revised "Public Access Policy," effective April 7, 2008. The NIH's revised policy requires that NIH-funded authors submit to PubMed Central (PMC), or have submitted on their behalf, their peer-reviewed author manuscripts, to appear on PMC no later than 12 months after final publication.

Elsevier will send to PMC the final peer-reviewed manuscript, which was accepted for publication and sent to Elsevier's production department, and that reflects any author-agreed changes made in response to peer-review comments. Elsevier will authorize the author manuscript's public access posting 12 months after final publication. Following the deposit by Elsevier, authors will receive further communications from the NIH with respect to the submission.

### **Alzheimer's Disease and Associated Disorders**

<http://edmgr.ovid.com/adad/accounts/ifaauth.htm>

As a service to our authors, LWW will identify to the National Library of Medicine (NLM) articles that require deposit and will transmit the post-print of an article based on research funded in whole or in part by the National Institutes of Health, Wellcome Trust, Howard Hughes Medical Institute, or other funding agencies to PubMed Central. The revised Copyright Transfer Agreement provides the mechanism.

### **American Journal of Geriatric Psychiatry**

Although this journal is published by LWW, the journal website does not provide information as to information for NIH-funded authors (see Alzheimer's Disease and Associated Disorders).

### **American Journal of Human Genetics**

[http://www.ajhg.org/images/AJHG\\_Instructions\\_for\\_Authors.pdf](http://www.ajhg.org/images/AJHG_Instructions_for_Authors.pdf)

AJHG facilitates author posting in connection with the voluntary posting request of the NIH (referred to as the NIH “Public Access Policy,” see <http://publicaccess.nih.gov/>) by submitting all peer-reviewed authors’ manuscripts directly to PubMed Central six months after publication. This ensures that you will have responded fully to the NIH policy and also the policies of other research funding organizations, such as Wellcome Trust and Howard Hughes Medical Institute.

### **Archives of Neurology**

<http://archneur.ama-assn.org/misc/authors.dtl#depositing>

Some funding organizations require that authors of manuscripts reporting research deposit those manuscripts with an approved public repository, such as PubMed Central. Authors have the *Archives Journals*’ permission on the following conditions:

1. Permission is granted only for manuscripts reporting research funded by not-for-profit organizations to be deposited in not-for-profit, publicly available repositories.
2. Permission is granted to post only the manuscript reporting research that was submitted and accepted for publication but not the final, edited, formatted, and published article.
3. Authors must ensure that the posted manuscript links back to the published article on the *Archives Journals* Web site to provide readers with access to the final reviewed and edited version plus any corrections and letters, as well as the article-related features only available on the *Archives Journals* Web site.
4. Authors who submit their manuscripts to an approved public repository, such as PubMed Central, must indicate that the manuscript may not be made available to the public sooner than 12 months after publication in the *Archives Journals*.

If authors adhere to these requirements, they may submit the final accepted version of the manuscript to the repository, if and only if the repository ensures that the deposited manuscript will not be made available to the public during the 12-month embargo following publication in the *Archives Journals*.

### **BMC Neurology**

[http://publicaccess.nih.gov/submit\\_process\\_journals.htm](http://publicaccess.nih.gov/submit_process_journals.htm)

If you publish in this journal, no further action is needed to comply with the submission requirement of NIH Public Access Policy.

### **Brain Research**

<http://www.elsevier.com/wps/find/authorsview.authors/nihauthorrequest>

As a service to our authors, Elsevier will deposit to PubMed Central (PMC) author manuscripts on behalf of Elsevier authors reporting NIH funded research. This service is a continuation of Elsevier’s 2005 agreement with the NIH when the NIH introduced their voluntary ‘Public Access Policy.

The service will help authors comply with the National Institutes of Health (NIH) revised “Public Access Policy,” effective April 7, 2008. The NIH’s revised policy requires that NIH-funded authors submit to PubMed Central (PMC), or have submitted on their behalf, their peer-reviewed author manuscripts, to appear on PMC no later than 12 months after final publication.

Elsevier will send to PMC the final peer-reviewed manuscript, which was accepted for publication and sent to Elsevier's production department, and that reflects any author-agreed changes made in response to peer-review comments. Elsevier will authorize the author manuscript's public access posting 12 months after final publication. Following the deposit by Elsevier, authors will receive further communications from the NIH with respect to the submission.

### **Clinical Diabetes**

No information.

### **Clinical Gerontologist**

No information.

### **Dementia**

No information.

### **Development**

[http://www.biologists.com/web/submissions/dev\\_information.html](http://www.biologists.com/web/submissions/dev_information.html)

Authors funded by NIH grants awarded after May 2005; by Wellcome Trust grants awarded after October 2005; or by UK Medical Research Council (MRC) and UK Biotechnology & Biological Sciences Research Council (BBSRC) grants awarded after October 2006 may deposit accepted author manuscript files (not the typeset journal PDF file) in PubMedCentral for release six months after publication, or immediately if an 'open access' fee has been paid.

### **Diabetes**

<http://diabetes.diabetesjournals.org/misc/DiabetesOpenAccess.pdf>

Beginning with the July 2008 issue, all articles published in *Diabetes* will be deposited in PubMed Central, a repository of peer-reviewed research maintained by the National Institutes of Health. ADA is providing this service at no cost to authors. Articles will be accessible on PubMed Central 12 months after the date of final print/online publication in *Diabetes*.

### **Diabetes Care**

<http://diabetes.diabetesjournals.org/misc/DiabetesOpenAccess.pdf>

Beginning with the July 2008 issue, all articles published in *Diabetes Care* will be deposited in PubMed Central, a repository of peer-reviewed research maintained by the National Institutes of Health. ADA is providing this service at no cost to authors. Articles will be accessible on PubMed Central 12 months after the date of final print/online publication in *Diabetes Care*.

### **Experimental Neurology**

<http://www.elsevier.com/wps/find/authorsview.authors/nihauthorrequest>

As a service to our authors, Elsevier will deposit to PubMed Central (PMC) author manuscripts on behalf of Elsevier authors reporting NIH funded research. This service is a continuation of

Elsevier's 2005 agreement with the NIH when the NIH introduced their voluntary 'Public Access Policy.

The service will help authors comply with the National Institutes of Health (NIH) revised "Public Access Policy," effective April 7, 2008. The NIH's revised policy requires that NIH-funded authors submit to PubMed Central (PMC), or have submitted on their behalf, their peer-reviewed author manuscripts, to appear on PMC no later than 12 months after final publication.

Elsevier will send to PMC the final peer-reviewed manuscript, which was accepted for publication and sent to Elsevier's production department, and that reflects any author-agreed changes made in response to peer-review comments. Elsevier will authorize the author manuscript's public access posting 12 months after final publication. Following the deposit by Elsevier, authors will receive further communications from the NIH with respect to the submission.

### **Gerontologist**

No information.

### **Human Mutation**

<http://www3.interscience.wiley.com/authorresources/journal-man-sub.html>

We will clarify our policy regarding the deposit of articles arising from research funded by the NIH when the NIH provides more details of the mandate that becomes effective on 7 April 2008.

### **Journal of the American Geriatric Society**

No information.

### **Journal of Applied Physiology**

<http://www.the-aps.org/publications/journals/nihpolicy.htm>

Under the NIH Public Access Policy, NIH is requiring that its funded investigators submit to PubMed Central (PMC) all manuscripts accepted after April 7, 2008, resulting from research supported in whole or in part with direct costs from NIH.

APS is negotiating with NIH to be able to upload accepted manuscripts that acknowledge NIH funding for authors. Until we are able to do this, however, you will need to upload the accepted manuscript yourself. Please choose the option to make the manuscript free 12 months after publication, to be in compliance with APS's copyright policy. This period of time is consistent with our existing policy to make all content publicly available through HighWire Press 12 months after print publication.

### **Journal of Biological Chemistry**

[http://publicaccess.nih.gov/submit\\_process\\_journals.htm](http://publicaccess.nih.gov/submit_process_journals.htm)

If you publish in this journal, no further action is needed to comply with the submission requirement of NIH Public Access Policy.

**However - note that there is a fee for non-ASBMB members.**

“This service will be free for ASBMB members and will cost \$50 for non-members. The \$50 fee covers the cost to the publisher to tag and upload high resolution figures and supply supplemental data from our vendors to PubMed Central. [ASBMB membership currently costs \$140/yr and includes many additional benefits so you may wish to consider joining and receive this service free of charge.

<http://www.asbmb.org/>

<http://www.jbc.org/misc/JBCRepository.shtml>

**Journal of Cell Biology**

[http://publicaccess.nih.gov/submit\\_process\\_journals.htm](http://publicaccess.nih.gov/submit_process_journals.htm)

If you publish in this journal, no further action is needed to comply with the submission requirement of NIH Public Access Policy.

**Journal of Clinical Investigation**

[http://publicaccess.nih.gov/submit\\_process\\_journals.htm](http://publicaccess.nih.gov/submit_process_journals.htm)

If you publish in this journal, no further action is needed to comply with the submission requirement of NIH Public Access Policy.

**Journal of Experimental Psychology: Human Perception and Performance**

<http://www.apa.org/journals/authors/pubmed-deposit.html>

APA will deposit appropriate manuscripts on behalf of the authors. Authors publishing in APA or EPF journals should NOT personally and directly deposit Word documents of APA accepted manuscripts or APA published articles in PMC. As the copyright holder, APA will deposit the final accepted manuscript at acceptance to be made available 11 1/2 months after the actual publication date of the article.

To assist with the deposit process, please provide your grant information on the deposit request form. Once deposited, the NIH Submission System will notify the Principal Investigator that the manuscript has been successfully submitted and an NIH Manuscript Submission reference number (NIHMS ID) will be assigned.

**Journal of Neurochemistry**

[http://www.blackwellpublishing.com/pdf/jnc\\_caf.pdf](http://www.blackwellpublishing.com/pdf/jnc_caf.pdf)

Copyright form not clear.

**Journal of Neuroscience**

<http://www.jneurosci.org/misc/ifacomply.shtml>

As a service to our authors, the *Journal of Neuroscience* will deposit in PubMed Central final versions of manuscripts that describe work that was funded by agencies that have this requirement. Manuscripts describing work that was funded by the NIH, HHMI and the Wellcome Trust and which are accepted for publication in the *Journal of Neuroscience* on or

after April 7, 2008 will be deposited. Authors funded by these agencies should make sure to accurately describe the source of funding in the acknowledgments section of their manuscripts.

Although the NIH policy calls for manuscripts in PubMed Central to be freely accessible after 12 months, The *Journal* will allow manuscripts to be publicly accessible through PubMed Central six months after publication, which is when all *Journal of Neuroscience* articles become freely accessible.

This service will be provided automatically, without a fee, and should fulfill the obligations that grantees of these agencies have to comply with the NIH Public Access Policy for articles published in the *Journal of Neuroscience*.

### **Journal of Nuclear Medicine**

No information.

### **Memory and Cognition**

<http://www.psychonomic.org/access.htm>

1. The PSP copyright agreement allows articles to be submitted to PubMed Central (PMC) and UK PubMed Central (UKPMC) in accordance with the policies of the NIH, the HHMI, the Wellcome Trust, and any other granting agencies that require archiving manuscripts as soon as they are accepted for publication. (PubMed Central is the U.S. National Institutes of Health [NIH] free digital archive of biomedical and life sciences journal literature, and UK PubMed Central is its European counterpart.) It is the author's responsibility to (1) inform the Publications Office that the article is subject to the Public Access Policy when it is accepted for publication; (2) upload the manuscript to PMC.
2. Authors may self-archive manuscripts (i.e., post them on their own Web site) before they have been peer reviewed.
3. Authors are permitted to self-archive manuscripts after they have been peer reviewed, revised, and accepted for publication (before they have been copyedited and typeset). The manuscript must include the following statement at the top of the title page:

This manuscript was accepted for publication in [name of journal] on [date]. The copyright is held by Psychonomic Society Publications. This document may not exactly correspond to the final published version. Psychonomic Society Publications disclaims any responsibility or liability for errors in this manuscript.

4. Authors are encouraged to provide the URL of self-archived manuscripts to the Publications Office so that a link may be placed in the list of manuscripts accepted for publication on the PSP Web site.

### **Nature Medicine**

[http://www.nature.com/authors/editorial\\_policies/license.html](http://www.nature.com/authors/editorial_policies/license.html)

When a manuscript is accepted for publication in an NPG journal, authors are encouraged to submit the author's version of the accepted paper (the unedited manuscript) to [PubMed Central](#)

or their appropriate funding body's archive, for public release six months after publication. In addition, authors are encouraged to archive this version of the manuscript in their institution's repositories and, if they wish, on their personal websites, also six months after the original publication. In all these cases, authors should cite the publication reference and [DOI number](#) on any deposited version, and provide a link from it to the URL of the published article on the journal's website (see [publications A-Z index](#)).

### **Neurobiology of Aging**

<http://www.elsevier.com/wps/find/authorsview.authors/nihauthorrequest>

As a service to our authors, Elsevier will deposit to PubMed Central (PMC) author manuscripts on behalf of Elsevier authors reporting NIH funded research. This service is a continuation of Elsevier's 2005 agreement with the NIH when the NIH introduced their voluntary 'Public Access Policy.

The service will help authors comply with the National Institutes of Health (NIH) revised "Public Access Policy," effective April 7, 2008. The NIH's revised policy requires that NIH-funded authors submit to PubMed Central (PMC), or have submitted on their behalf, their peer-reviewed author manuscripts, to appear on PMC no later than 12 months after final publication.

Elsevier will send to PMC the final peer-reviewed manuscript, which was accepted for publication and sent to Elsevier's production department, and that reflects any author-agreed changes made in response to peer-review comments. Elsevier will authorize the author manuscript's public access posting 12 months after final publication. Following the deposit by Elsevier, authors will receive further communications from the NIH with respect to the submission.

### **Neurobiology of Disease**

While this is an Elsevier journal (see Brain Research) it does not link to the statement as provided on: <http://www.elsevier.com/wps/find/authorsview.authors/nihauthorrequest> . Authors are encouraged to seek clarification before submitting a manuscript for peer review.

### **Neuroepidemiology**

No information.

### **Neuroimage**

<http://www.elsevier.com/wps/find/authorsview.authors/nihauthorrequest>

As a service to our authors, Elsevier will deposit to PubMed Central (PMC) author manuscripts on behalf of Elsevier authors reporting NIH funded research. This service is a continuation of Elsevier's 2005 agreement with the NIH when the NIH introduced their voluntary 'Public Access Policy.

The service will help authors comply with the National Institutes of Health (NIH) revised "Public Access Policy," effective April 7, 2008. The NIH's revised policy requires that NIH-funded authors submit to PubMed Central (PMC), or have submitted on their behalf, their peer-reviewed author manuscripts, to appear on PMC no later than 12 months after final publication.

Elsevier will send to PMC the final peer-reviewed manuscript, which was accepted for publication and sent to Elsevier's production department, and that reflects any author-agreed changes made in response to peer-review comments. Elsevier will authorize the author manuscript's public access posting 12 months after final publication. Following the deposit by Elsevier, authors will receive further communications from the NIH with respect to the submission.

### **Neurology**

Policy is in process of being clarified with publisher.

### **Neuron**

<http://www.cellpress.com/misc/page?page=nihpage>

As a service to our authors, Cell Press will deposit to PubMed Central (PMC) author manuscripts on behalf of Cell Press authors reporting NIH funded research. This service is a continuation of Elsevier's 2005 agreement with the NIH when the NIH introduced their voluntary "Public Access Policy."

The service will help authors comply with the National Institutes of Health (NIH) revised "Public Access Policy", effective April 7, 2008. The NIH's revised policy requires that NIH-funded authors submit to PubMed Central (PMC), or have submitted on their behalf, their peer-reviewed author manuscripts, to appear on PMC no later than 12 months after final publication.

We will send to PMC the final peer-reviewed manuscript, which was accepted for publication and sent to our production department, and that reflects any author-agreed changes made in response to peer-review comments. We will authorize the author manuscript's public access posting 12 months after final publication. Following the deposit, authors will receive further communications from the NIH with respect to the submission.

Authors are also welcome to post their accepted author manuscript on their personal or institutional web site. Please note that consistent with Elsevier's author agreement, authors should not post manuscripts directly to PMC or other third party sites.

### **PLoS Biology**

[http://publicaccess.nih.gov/submit\\_process\\_journals.htm](http://publicaccess.nih.gov/submit_process_journals.htm)

If you publish in this journal, no further action is needed to comply with the submission requirement of NIH Public Access Policy.

### **PNAS**

[http://publicaccess.nih.gov/submit\\_process\\_journals.htm](http://publicaccess.nih.gov/submit_process_journals.htm)

If you publish in this journal, no further action is needed to comply with the submission requirement of NIH Public Access Policy.

Information current as of 09 May 2008. Please verify policies as noted with the publisher or check [http://publicaccess.nih.gov/submit\\_process\\_journals.htm](http://publicaccess.nih.gov/submit_process_journals.htm)

### **Psychiatric Research –Neuroimaging**

While this is an Elsevier journal (see Brain Research) it does not link to the statement as provided on: <http://www.elsevier.com/wps/find/authorsview.authors/nihauthorrequest> . Authors are encouraged to seek clarification before submitting a manuscript for peer review.

### **Psychology and Aging**

<http://www.apa.org/journals/authors/pubmed-deposit.html>

Authors publishing in APA or EPF journals should NOT personally and directly deposit Word documents of APA accepted manuscripts or APA published articles in PMC. As the copyright holder, APA will deposit the final accepted manuscript at acceptance to be made available 11 1/2 months after the actual publication date of the article.

To assist with the deposit process, please provide your grant information on the deposit request form. Once deposited, the NIH Submission System will notify the Principal Investigator that the manuscript has been successfully submitted and an NIH Manuscript Submission reference number (NIHMS ID) will be assigned.

### **Radiology**
